1. Claims 1-10 are allowed. Claim 1 is independent.

The amendment filed August 13, 2007 has overcome the objection set forth in the previous Office action mailed June 27, 2007.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art of record. The closest prior art Kimura (U.S. Patent No. 5,767,901), cited below, does not disclose a combination of the claimed "analog frontend IC" provided internally with the claimed "analog amplifiers" and "multiplexer" and the limitation "wherein the respective light reception signals output from the first, the second and the third shift registers, respectively are provided as the analog input signals to the analog amplifiers for the channels corresponding to the respective shift registers", in combination with other limitations of claim 1.

Claims 2-10 depend on claim 1, directly or indirectly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
